

VICTOR CALDERON

victor.calderon@vanderbilt.edu ◇ <http://vcalderon.me>

6301 Stevenson Center Lane ◇ Office 6902 ◇ Nashville, TN 37240

EDUCATION

Vanderbilt University

Ph.D. Candidate in Physics with focus in Astronomy
Adviser: [Andreas Berlind](#)

June 2013 - Present

GPA 3.74 / 4.00

Florida Institute of Technology

B.Sc. in Astronomy & Astrophysics
B.Sc. in Physics
B.Sc. in Mathematical Sciences

August 2009 - May 2013

Magna Cum Laude, GPA 3.75 / 4.00

RESEARCH EXPERIENCE

Vanderbilt University

Graduate Student Researcher under [Andreas Berlind](#)

June 2013 - Present

Nashville, TN

- Construct algorithms that analyze astronomical data in order to better constrain the current models for the *galaxy-halo* connection
- Create synthetic catalogues that simulate the observed Universe in order to statistically constrain current models on galaxy formation and evolution.

Florida Institute of Technology

Undergraduate Researcher under [Prof. Hakeem Oluseyi](#)

August 2012 - August 2013

Melbourne, FL

- Development of astronomical templates relating observations of RR-Lyrae stars to physical parameters such as iron abundance, luminosity, and chemical composition of these stars.
- Use of Discrete Fourier Transforms (DFTs) and Principal Component Analysis (PCA) methods to get a better understanding of the physical properties of RR-Lyrae stars.

Massachusetts Institute of Technology

MSRP Summer Research Intern under [Prof. Paulo Lozano](#)

June 2012 - August 2012

Cambridge, MA

- Design and fabrication of an electrospray system capable of producing sub-micron glass droplets, ultimately enabling the manufacturing of high-power nano-structured emitters on planar surfaces.
- Development of mathematical models and algorithms to depict the physical characteristics of borosilicate glass, such as viscosity, volumetric flux, and thermal expansion, among other.

Florida Institute of Technology

Undergraduate Researcher under [Prof. Matt Wood](#)

January 2012 - May 2012

Melbourne, FL

- Study of cataclysmic variable stars in binary systems by detection of dwarf-nova outbursts and super-outbursts from these systems.
- Use of Discrete Fourier Transform (DFT) methods in the analysis of short-cadence light curves.

Florida Institute of Technology

Undergraduate Researcher under [Prof. Daniel Batcheldor](#)

August 2011 - May 2013

Melbourne, FL

- Reverberation mapping of dusty tori in active galactic nuclei (AGN) with the purpose of furthering the current theoretical models of black holes by conducting global monitoring of Type 1 AGNs objects.
- Photometric observations of AGNs using observatories in Tucson, Arizona and Cerro Tololo, Chile.

- Measurements of the “light echo” as dusty tori respond to variations in the optical/ultraviolet continuum.

TECHNICAL STRENGTHS & SKILLS

Computer Languages	Python, L ^A T _E X, C, Cython, Bash, Matlab, IRAF, SolidWorkds, R Statistical computing, Microsoft Office
Operating Systems	Unix/Linux, Windows, Mac OS
Languages	Spanish (native), English (fluent), German (conversational)

PRESENTATIONS & WORKSHOPS

Big Data Analysis in Astronomy Talk & Poster - La Laguna, Tenerife, Spain	2018
.Astronomy X Workshop -Baltimore, MD	2018
Sugar Rush 2018 Talk -Shanghai, China	2018
Vanderbilt Data Science Symposium - Talk and Poster -Nashville, TN	2018
Quantifying and Understanding the GalaxyHalo Connection Talk & Poster -Santa Barbara, CA	2017
SnowPAC 2016 Galaxy-Halo Connection Talk -Salt Lake City, UT	2016
AAS 227 th Winter Meeting -Kissimmee, FL	2016
Inclusive Astronomy 2015 -Nashville, TN	2015
AAS 225 th Winter Meeting -Seattle, WA	2015
School on Dark Energy and Galaxy Redshift Surveys -Corfu, Greece	2014
Summer School in Statistics for Astronomers X at Penn. State University -State College, PA	2014
SciCoder Workshop 2013 at New York University -New York City, NY	2013
National Collegiate Research Conference at Harvard University -Cambridge, MA	2013
NSF 2012 AGMUS Research Symposium -San Juan, PR	2012
27 th MIT Annual Summer Research Programs Poster Presentation -Cambridge, MA	2012

AWARDS

2nd Best Poster Award with \$500 prize - Big Data Symposium - Vanderbilt University	2018
Summer Travel Research Award - Summer 2017 - Vanderbilt University	2017
Summer 2014 Research Award - Summer 2014 - Vanderbilt University	2014
Summer 2013 Research Award - Summer 2013 - Vanderbilt University	2013
Best Poster Presentation Award - NSF 2012 AGMUS Research Symposium	2012
Outstanding Senior in Astrophysics & Astronomy Award - Florida Inst. of Tech.	2012
Distinguished Student Scholar Award - Florida Inst. of Tech.	2011
Elected to Phi Kappa Phi (Florida Inst. of Tech.)	2011
Elected to Phi Eta Sigma (Florida Inst. of Tech.)	2010
Dean's List (Florida Inst. of Tech.)	2009 - 2013

HONOR SOCIETIES & ORGANIZATIONS

National Honor Society Phi Kappa Phi	(ΦΚΦ)
National Honor Society Phi Eta Sigma	(ΦΗΣ)
Physics Honor Society - Sigma Pi Sigma	(ΣΠΣ)
Society of Physics Students (SPS)	

ACADEMIC SERVICE

Instructor of the Vanderbilt-Fisk Computational Bootcamp	Fall 2018
Maintainer of Vanderbilt Astro - Starting Grad School Guide	2018 - present
SciCoder 2017 - Local Organizing Committee member - Vanderbilt University	2017
Co-leader of the Vanderbilt Computational Workshop	2017
MIT Summer Research Program Review Committee	2016, 2017, 2018
Web Admin for the Vanderbilt Astronomy Group website	2015 - present
Host for Vanderbilt Astronomy Journal Club	2015 - present
